DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant Admitted Prior Art in view of Kayser et al. (6,266,052).

As per claims 1 and 5, Applicant Admitted Prior Art disclose a wireless communication information storage medium for exchanging data with an external device by receiving a radio signal having a given carrier frequency as power supply from the external device through an antenna having an antenna (fig. 3/no. 6a, 6b) receiving a radio signal having a given carrier frequency from the external device, a capacitor (fig. 3/no. 5) storing electric power; a diode (fig. 3/no. D1) placed between one end of the antenna and the capacitor, and a load modulation circuit (fig. 3/no. 4).

Applicant Admitted Prior Art does not explicitly suggest that the capacitor is charging on a half cycle and the load modulation receive power supply from the capacitor on another half cycle. Kayser et al. disclosed such method of induction/charging on one cycle and modulation on another cycle (fig. 6, 7, col. 7/ln. 64-col. 9/ln. 12, col. 9/ln. 40-col. 10/ln. 5). Therefore, it would have been obvious to one of

Art Unit: 2618

ordinary in the art to provide such method of induction/charging on one cycle and modulation on another cycle, as taught by Kayser et al., to the wireless IC of the Applicant Admitted Prior Art to reduce noises during communication transmission.

Allowable Subject Matter

3. Claims 2-4 and 6-8 are allowed.
